- Fact Sheets Translate Research
- Bi-Monthly Newsletter
- Workshops and Field Tours

The screenshot shows the homepage of the Southern Fire Exchange Resource Center. The header includes the Southern Fire Exchange logo, the text 'SOUTHERN Fire Exchange A JFSP Knowledge Exchange Consortium', a search bar, and the Joint Fire Science Program logo. The main content area features a 'Welcome to the Southern Fire Exchange Resource Center' message, a 'NEW PUBLICATION' section with a featured article on prescribed fire, and a grid of various resources including 'ABOUT SFE', 'MODEL & TOOL B', 'PLAN YOUR BURN', 'PRESCRIBED FIRE COUNCILS', 'DISCUSSION FORUM', 'EVENTS CALENDAR', 'PRODUCTS', 'FIRE SCIENCE LIBRARIES', and 'PROFESSIONAL DEVELOPMENT'. The footer contains logos for 'GoodFIRES' and 'VISIT MY FOREST'.

Sling vs. Kestrel Testing Methods

- Tested a range of RH values (5,10,30,50%)
- Tested a range of air temp values (60,80,100F)
- Randomized block design
- Two experimental phases
 - **Phase 1:** (Tools straight out of the truck / pack)
 - **Phase 2:** (Optimum: new wicks, DI H₂O, Factory Calibrated Kestrels)

All research conducted by Chuck McHugh, USFS RMS cmchugh@fs.fed.us

Average RH Error, %

	Phase 1 Avg Error	Phase 2 Avg Error	Difference (%)
SlingA	7.70	5.15	-2.55
SlingB	12.34	6.12	-6.22
3000A	0.95	0.86	-0.09
3000B	1.45	1.68	0.23
4500A	-1.95	0.56	2.51
4500B	4.02	-0.02	-4.04
435A #1		0.37	
435A #2		-2.24	

**SOUTHERN
Fire Exchange**
Uniting Fire Science and Natural Resource Management

Sling vs. Kestrel Testing Results

- Dry bulb temperature is the same
- Sling was always higher (+) than actual RH
- Calibrated Kestrel closer to actual RH
- Kestrel more accurate at very low RH (< 10%)
- Kestrel calibration does reduce error (although it's costly)

All research conducted by Chuck McHugh, USFS RMS cmchugh@fs.fed.us

CalTopo.com

- Free for basic users
- Suite of preset map styles make cartography FAST and very SIMPLE.
- Import KML and GPX Files
- Arrange Layers. Drop Points. Edit Tracks / Points.
- Simple export to GeoPDF file with a custom QR code
- Save it to DropBox and load it right into Avenza on your mobile device

PRESCRIBED FIRE!

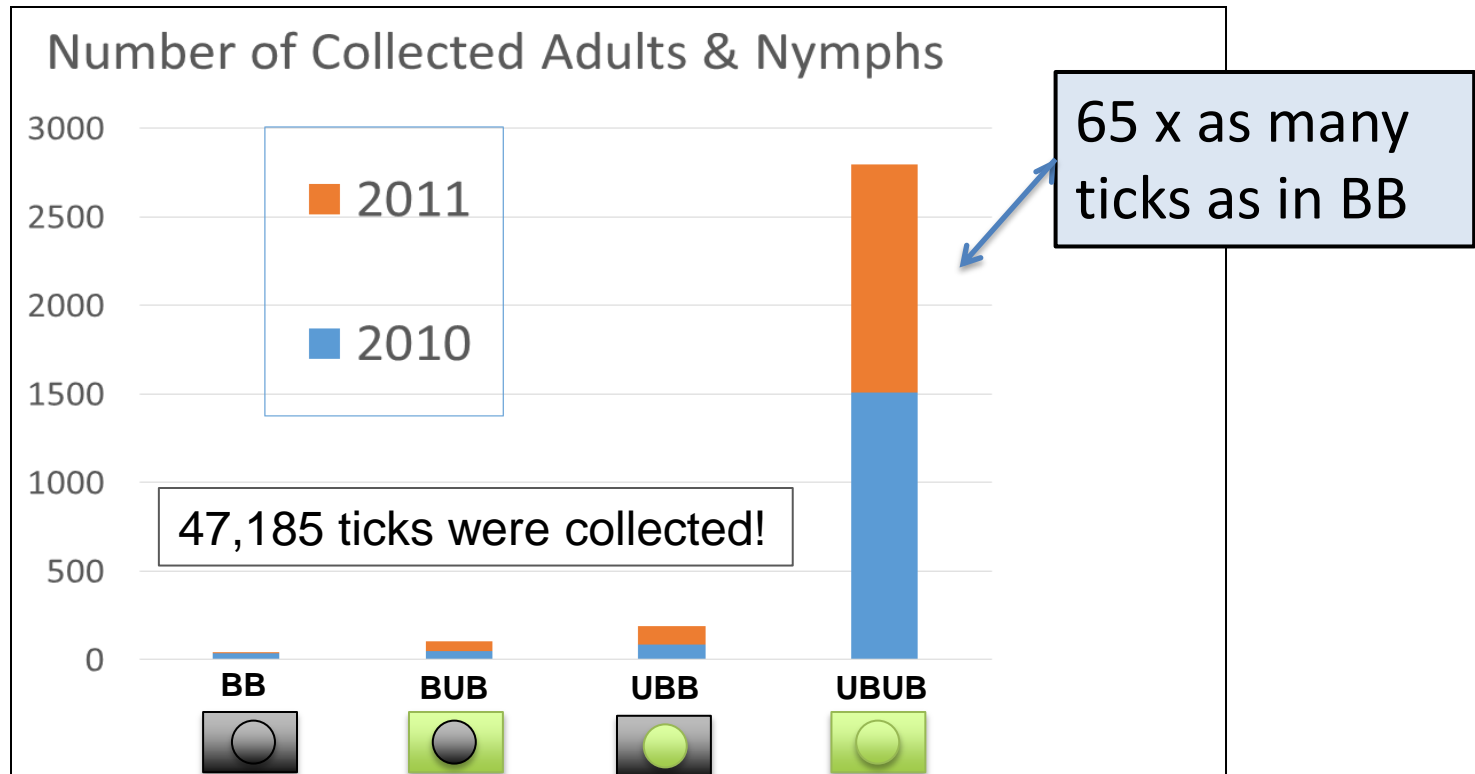

Prescribed Fire and Tick Research Methods

- First long-term (24 months) study of operational prescribed fire impacts on ticks
- Unburned sites: no fire for at least 10 years
- Sampled 4 Site Types (21 different locations):
 - Burned Surrounded by Burned (BB) 
 - Burned Surrounded by Unburned (BUB) 
 - Unburned Surrounded by Burned (UBB) 
 - Unburned Surrounded by Unburned (UBUB) 

SOUTHERN Fire Exchange

Uniting Fire Science and Natural Resource Management

BB = Burned Surrounded by Burned

BUB = Burned Surrounded by Unburned

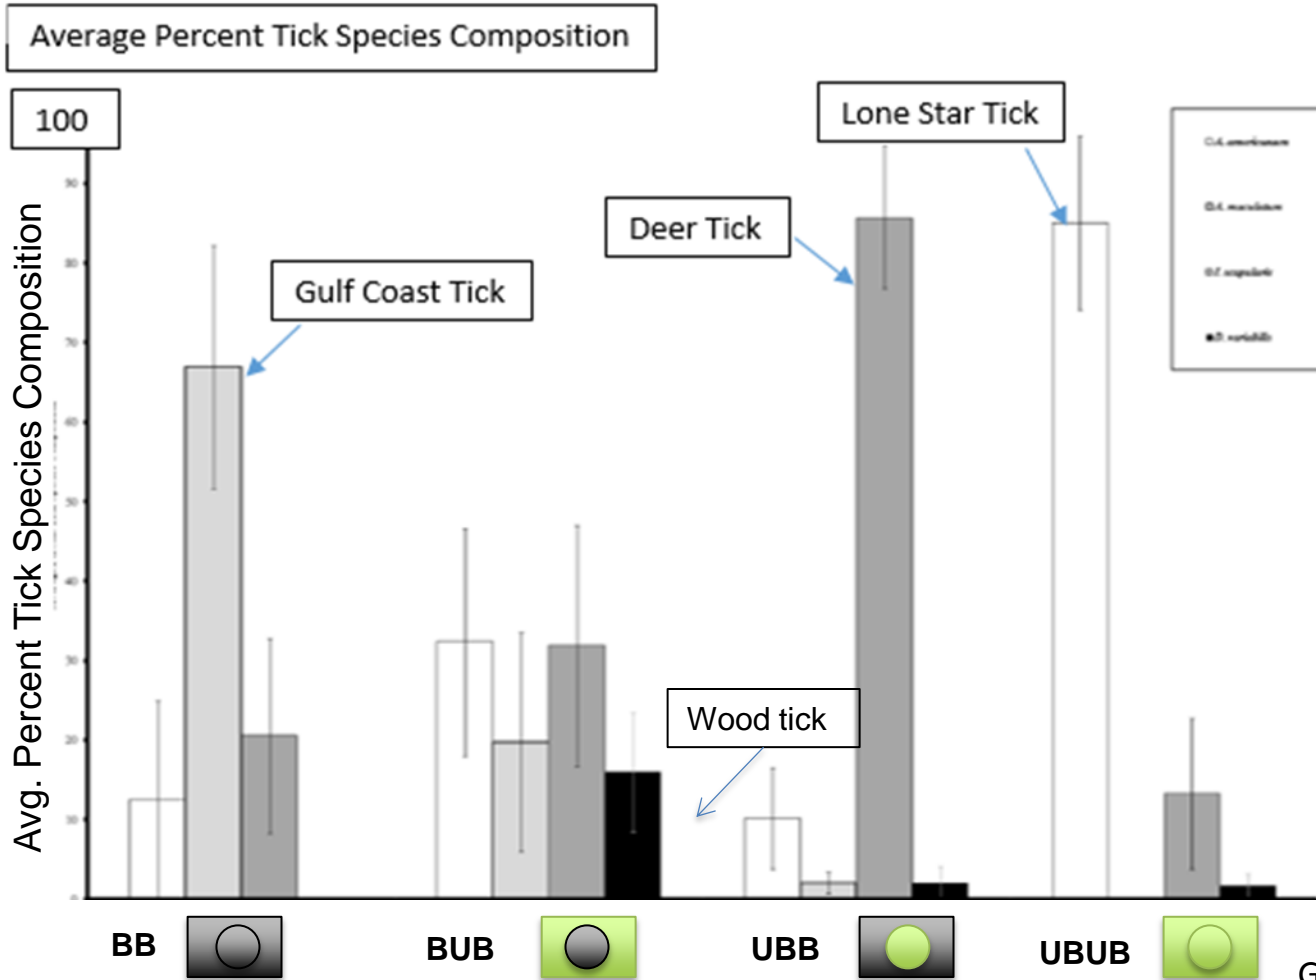

UBB = Unburned Surrounded by Burned

UBUB = Unburned Surrounded by Unburned

Where will the trees
be sneezing this afternoon?

Ask **WindNinja!**

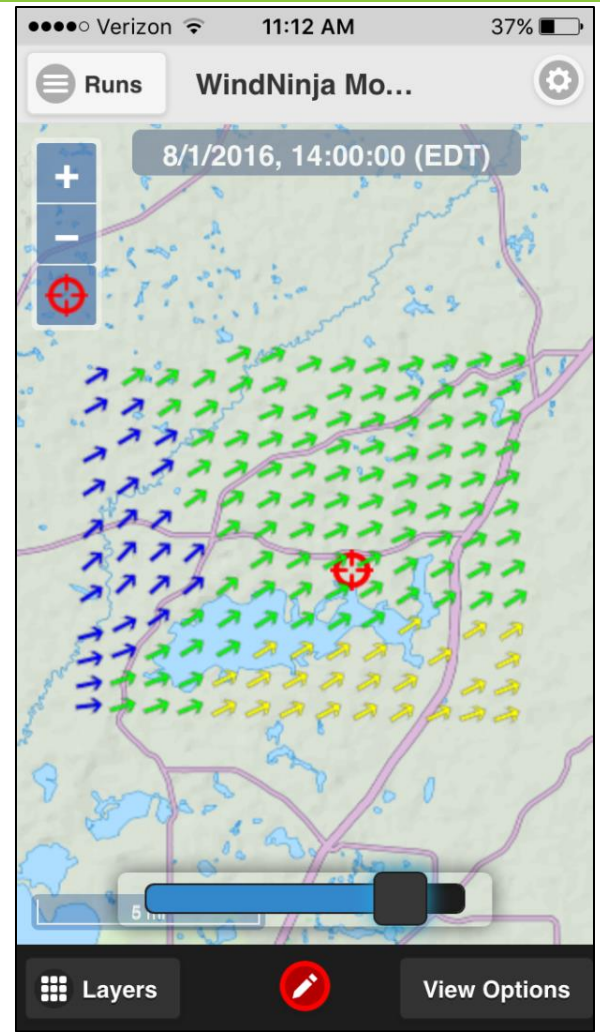

SOUTHERN Fire Exchange

Uniting Fire Science and Natural Resource Management

- **WindNinja Mobile** is a mobile app for iOS and Android devices developed by USFS Fire Lab.
- Pocket-sized version of WindNinja desktop application.
- Creates high resolution predicted hourly wind speed and direction graphics.

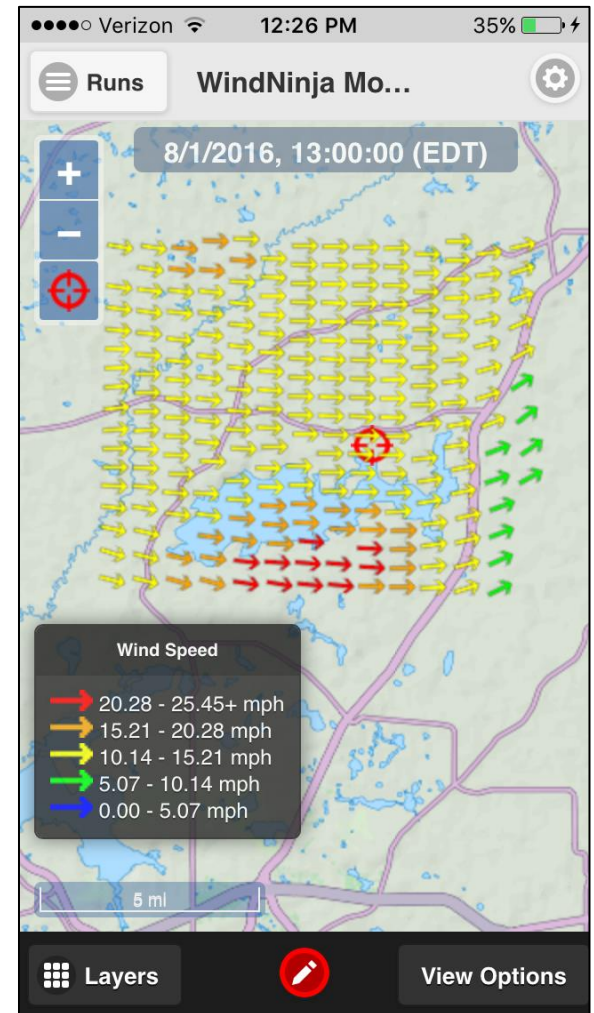

SOUTHERN Fire Exchange

Uniting Fire Science and Natural Resource Management

- **WindNinja Mobile** uses NWS weather predictions to model wind interaction with topography and vegetation height on a 3D grid

SOUTHERN Fire Exchange

Uniting Fire Science and Natural Resource Management

1. Download App
2. Request free account via App
3. Finger swipe to select project area (1km² – 50km²)

SOUTHERN Fire Exchange

Uniting Fire Science and Natural Resource Management

4. Name model run
5. Select NWS wind Model
 - CONUS Short-Term (3 km grid, 1hr step, 15 fx, 1 hr. refresh)
 - CONUS Long-Term (12 km grid, 3 hr step, 86 fx, 6 hr. refresh)
6. Duration (hours)
7. Veg Type (Surface height)

Verizon 11:06 AM 40%

WindNinja Run Creation

Name:
TTRS Test

Forecast Model:
CONUS (Short-term)

Forecast Duration: (hours)
4

Vegetation:
Grass

Notifications:
The run will be completed on a remote server. Enable the text/email options below if you want to be notified when your run is ready for download.

**SOUTHERN
Fire Exchange**
Uniting Fire Science and Natural Resource Management

Unfinished research update:

- 1. Southern Integrated Prescribed Fire Information System for Air Quality and Health Impacts**
NCSU and Georgia Tech –JSFP supported project to develop a Rx Fire information system.
- 2. Advanced material fire shelter project. NCSU – FEMA supported project to make a better fire shelter.**

**SOUTHERN
Fire Exchange**
Uniting Fire Science and Natural Resource Management

Take-Home Points

- **Kestrel Weather Meters more accurately measure RH than sling psychrometers.**
- **CalTopo.com is an easy way to make custom geoPDF maps.**
- **Prescribed fire management significantly reduces tick populations.**
- **WindNinja Mobile is a new mobile app for modeling interaction of wind and terrain at local scales.**
- **Fire Needs Assessment and Improved fire shelter in the future.**
